

Homework 2.2: [530]

[Drew Remmenga]

July 10, 2024

Exercise 3.8 (a) Non response bias since only about a third of people contacted participate. Selection bias since only household that were selected to participate. Interviewer bias since the interviews could be inadequately trained and could have different styles.

Exercise 3.8 (b) Non response bias could result in under or over estimating certain characteristics. Respondents could only respond with certain answers which don't reflect their true opinions.
